About Kevin

Kevin Ewing helps clients with federal natural resources law and policy. He advises chiefly energy and infrastructure companies pursuing development projects, federal authorizations, or changes in agency policy, and in responding to federal enforcement and incident investigations. His clients are involved in offshore wind and O&G development, natural gas and liquids pipelines, LNG, power transmission, and urban park renewal. Kevin has almost thirty years of experience helping clients bring infrastructure projects online. He has frequently been involved in efforts to improve federal policies governing infrastructure and related permitting and agency reviews. Kevin's work extends to many statutes, including the major pollution control statutes, NEPA, NHPA, the Natural Gas Act, the Pipeline Safety laws, and federal laws governing urban parks, such as LWCFA and UPARR.

An area of special focus for more than twenty years is corporate disclosure concerning environmental, social, and governance issues (ESG) and related shareholder demands and governmental inquiries (including under the Martin Act) about climate change, hydraulic fracturing, and similar topics. He advises publicly-traded energy companies on mandatory reporting, sustainability reporting, and related litigation and policy issues.

Recent Notable Matters

Invenenergy and energyRe — as project sponsors, in forming a consortium of investors that secured one of six leases in the New York Bight offshore wind auction

Equinor — \$1.1 billion sale to bp plc of a 50 percent interest in Equinor's U.S. offshore wind development portfolio, including formation of a partnership to develop and operate the Empire Wind project offshore New York and Beacon Wind project offshore Massachusetts, which together could generate over 4 GW of power

City of Chicago — federal permitting, environmental impact assessment, historic preservation, and related litigation for projects in support of The Barack Obama Presidential Center and other urban park initiatives

Project Development

Equinor — federal leasing, permitting, and environmental impact analyses to support multiple utility-scale projects forming the U.S. offshore wind portfolio of the company, in addition to related federal litigation

Multiple LNG projects (import and export) — environmental aspects of LNG storage, regasification, and liquefaction projects, including siting, permit strategy, and environmental impact assessment

Offshore LNG facility — defense of the Deepwater Port Act license (Gulf Restoration Network v. U.S. Department of Transportation, 452 F.3d 362 (5th Cir. 2006))

Pipeline developers and anchor shippers — permitting, environmental impact assessment, FERC environmental requirements and related litigation for proposed natural gas and liquids pipelines

Nonprofit developer — NEPA litigation defending against challenges to federal approvals for an urban park project supporting underserved environmental justice communities in southwestern Michigan

Multiple trade associations and business groups, and their member companies — advise and advocate on modernizing federal policy under NEPA, Clean Water Act, Natural Gas Act, and the pipeline and LNG safety statutes aimed at improving permitting and safety of energy and other infrastructure

Safety and Incidents

LNG developer and operator — federal safety requirements and governmental inspections for developing and operating LNG assets, including an LNG release and related administrative actions by U.S. DOT/PHMSA

Halliburton Energy Services, Inc. / Macondo — federal government investigations concerning the Macondo well control incident

Oilfield services and E&P companies — post-Macondo federal policy and regulatory developments affecting energy development; permitting and financial assurance requirements; liability and enforcement; federal land policies; and the requirements of NEPA and species protection

Energy companies operating offshore — development risk analysis associated with numerous proposed and operating offshore and nearshore energy facilities in the Northeastern U.S., Mid-Atlantic, and Gulf of Mexico

Midstream and downstream energy companies — compliance support concerning pipeline safety, Presidential and other federal permitting, jurisdictional issues for offshore and onshore gathering and transmission pipelines, and regulatory support in A&D

Corporate Disclosures

Publicly-traded upstream energy company — securing SEC Staff no-action letter concerning shareholder climate proxy proposal

Publicly-traded energy companies — response to shareholder proxy proposals on environmental issues and advice on long-term strategies for shareholder engagement

Publicly-traded energy companies — mandatory and voluntary disclosure to shareholders concerning environmental matters under Regulation S-K

Publicly-traded energy company — defense of Martin Act investigation concerning shareholder disclosure relating to climate change

Publicly-traded energy company — defense of Martin Act investigation concerning shareholder disclosure relating to hydraulic fracturing
