

# 73rd Annual Energy Law Conference 2022

Event

January 24, 2022 | 1 minute read | Houston

---

Oil and gas lawyers, Travis Counts and Luke Tanner presented on the panel “Key Considerations in E&P-Midstream Joint Ventures. Exploration and production, especially non-conventional, and midstream business models continue to evolve in an era of core competency focus and consolidation. This panel and the accompanying materials focused on legal and business issues associated with E&P-Midstream Joint Ventures, including:

- core business protection from volume, areal and service perspectives
- operational scale and peak rate management
- marketing focus
- asset value maximization
- successor benefit and burden
- future upside potential
