

AI Buyer Beware: You Are Accountable for How Your AI Works

Media Mentions

October 22, 2020 | *SAP Insights* | 1 minute read | Houston

Bracewell's **Jeff Andrews**, chair of firm's technology transactions practice, examines liability and risk mitigation associated with AI transactions in an article for *SAP Insights*.

Absent a pressing public policy concern, the courts rarely deviate from settled case law; therefore, "those basic principles around limitation on liability provisions in contracts are going to stand," says Andrews.

With regards to mitigation, a human touch can make a difference. "Having an individual in the loop to double-check what the algorithm is spitting out is definitely risk mitigation," he added.
