

# Chamber Pitches Utility GHG Rule Analysis Updates to Boost Repeal Case

Media Mentions

July 14, 2025 | *Inside EPA* | 1 minute read | Washington, DC

---

The US Chamber of Commerce is [offering suggestions](#) for how the Environmental Protection Agency (EPA) should change its cost-benefit analysis of the agency's proposal to repeal Biden-era power plant greenhouse gas standards. A representative of the Chamber's Global Energy Institute urged EPA to finalize a rule "that results in the elimination of [the Biden-era] aspirational requirements" largely premised on power plants installing carbon capture and storage (CCS).

Bracewell's **Jeff Holmstead** previously told *Inside EPA* that "it's really illegitimate to assume that all of [the Biden rule's] benefits would have taken place if the technology is not available."
