

New Methane Rules Could Cut Key Risk for Oil, Gas Sector Amid Energy Transition

Media Mentions

May 28, 2021 | *S&P Global* | 1 minute read | Washington, DC

Frank Maisano talked with *S&P Global* about the potential impact of new methane emission rules by the Biden administration on the oil and gas sector's ability to address climate change.

"I look at this rule as a good opportunity where there will be a first real chance for all stakeholders to engage in the type of discussion that can produce a meaningful solution [while] at the same time protect those jobs and those regional economies that are supported by oil and gas," said Maisano.
