

# Perspectives on Large-Scale Project Development

Event

October 03, 2024 | 1 minute read

---

Parker Lee will moderate a panel discussion titled “Perspectives on Large-Scale Project Development” at the Global Clean Hydrogen: American Production & International Markets conference. The panel will explore the status and outlook for deployment of large-scale hydrogen projects, including:

- Where are projects being developed, and what end-use markets are they targeting?
- What role are they playing in local energy transition efforts?
- How are projects assessing risk?
- What technology risks need to be addressed?
- What economic impacts are expected to be realized as projects scale up from pilot and demo scale?
- How are they dealing with finance providers' expectations?
