

Trump Administration Cancels \$3.7 Billion in Carbon Capture, Clean Energy Awards

Media Mentions

June 03, 2025 | *S&P Global* | 1 minute read | Washington, DC

The US Department of Energy (DOE) terminated 24 Biden administration awards for carbon capture and other emissions-reduction technologies. In total, DOE walked back \$3.7 billion in funding for carbon capture, clean hydrogen, renewables-plus-storage and other means.

“This is really a missed opportunity for DOE and this administration on carbon capture and sequestration projects that have long been supported by bipartisan members in Congress,” Bracewell’s **Frank Maisano** told *S&P Global*. “I would also remind that the majority of these projects are in red states and in industries that overwhelmingly support the president’s energy agenda.”
