

Trump Didn't Target EPA Climate Rules by Name. Here's Why.

Media Mentions

January 22, 2025 | *E&E News* | 1 minute read | Washington, DC

Despite the absence of climate rule names in President Donald Trump's sweeping executive orders, Bracewell's **Jeff Holmstead** told *E&E News* that it should not hinder the president's efforts to roll them back.

"I think the executive orders, more than anything else, are a way for an administration to sort of tout its agenda," said Holmstead.

He added that the administration may have "wanted a little bit more time to get their arms around" regulatory targets because the outgoing Biden administration left them with a glut of rules that met the criteria of being costly and burdensome to industry.
