Tom Tomlinson has spent his career working on energy transactions with a particular focus on the financing, development, acquisition and divestiture of traditional and renewable energy projects. Tom regularly counsels and assists energy-sector investors, sponsors and lenders regarding the development, financing, acquisition and divestiture of power generation facilities, upstream and midstream oil and gas projects, refineries and petrochemical facilities, pipelines, gathering and storage facilities, wind and solar facilities and other energy projects. Tom's deep understanding of the energy industry has been gained over decades of experience helping to structure and successfully navigate a wide variety of transactions in the sector. His goal on any engagement is to leverage that knowledge and the use of project and structured finance techniques to assist clients in maximizing the credit potential and value for the subject assets.
