

Environmental Litigation & Enforcement Defense

As *Chambers USA* (2021) observes, “[Bracewell] is very involved in climate change rulemaking litigation and other sophisticated proceedings.” We represent companies in complex litigation, enforcement proceedings and incident investigations, including parallel civil and criminal actions.

As companies face growing pressure to comply with federal and state mandates, our team helps these companies develop, implement and continuously improve strategies for cost-effective compliance.

Areas of Focus

[Environment, Lands and
Resources](#)
