How to Prepare for and Manage an OSHA PSM Inspection

October 9, 2018

By: [Robert S. Nichols](#) and [Kevin D. Collins](#)

Bob Nichols and Kevin Collins discuss preparations for an OSHA process-safety-management-standard (PSM) inspection. OSHA issued the PSM standard to help ensure the safe management of highly hazardous chemicals. The standard integrates hazard assessment, technology, procedures, and management practices, and PSM inspections are usually multi-day events that comprise a wide range of topical areas. We discuss how to prepare for an inspection, pitfalls, and best practices in an efficient, 30-minute webinar session.
